Apple released new details about its upcoming online Worldwide

Developers Conference this month, which sheds light on new features coming to the iPhone.

In a statement released Thursday, Apple said its [conference](#) will kick off on June 22 with a keynote at 1 p.m. ET (10 a.m. PT). The keynote typically serves as a time where Apple highlights its latest iOS operating system.

The conference will also include a series of smaller development labs where iOS developers gather more specifics on how to leverage [new features](#) on to their apps.

Apple's WWDC is typically an in-person event, but shifted to a fully online experience this year to help limit the spread of the coronavirus pandemic worldwide.

The tech giant typically focuses on software during WWDC, following up with a fall event during which they reveal the latest iPhone along with other upcoming devices.
