Four days after shelving an autonomous vehicle agreement with BMW, Mercedes has announced a deal to work with chip and software maker NVIDIA.

The companies said Tuesday that the two will create a computing and artificial intelligence system for automated driving. It will be rolled out

starting in 2024 in the [next generation](#) of Mercedes vehicles, allowing them to be upgraded with more automated driving functions.

The German automaker and Silicon Valley tech company say a main feature will be automated driving from address to address on regular routes. There also will be future safety and convenience functions, they said in a statement.

Last week Mercedes and BMW announced they had put on hold a deal with to jointly develop an autonomous driving system. The companies said the timing wasn't right for the cooperative agreement.
