

Apple near deal with Hyundai on autonomous cars: reports

February 4 2021

Apple is reportedly close to a deal to produce its own branded cars in the United States in a partnership with South Korean auto giant Hyundai

Apple is close to a deal on producing its own autonomous vehicles in cooperation with South Korean giant Hyundai with an announcement

likely as soon as this month, media reports said.

A report by CNBC television, citing unnamed sources, said Apple was working with Hyundai and its Kia brand to produce the car in the southern state of Georgia.

The report was the latest on the possible tie-up and Apple's efforts to develop its own vehicle using self-driving technology it has been developing for several years.

A Korean media report said Apple was set to make a multibillion dollar investment in Kia as part of the deal, which could be announced February 17, and that the firms planned to produce 100,000 vehicles per year from 2024.

Neither company commented on the reports.

CNBC said the deal had not been finalized but that the firms planned to make an Apple-branded autonomous electric vehicle at the Kia assembly plant in West Point, Georgia.

The report said Apple wanted to work with an established automaker willing to allow the California tech giant to control the software and hardware that will go into the [vehicle](#).

Last month, shares in Hyundai soared on reports it was in talks with Apple.

Hyundai said it had received requests to cooperate on self-driving [electric cars](#) from various companies, but did not confirm it was in discussions with Apple.
