

Intel hit with \$2.2 bn verdict in US patent trial

March 3 2021

Intel said it would appeal a jury award of more than \$2 billion in a patent infringement lawsuit

A federal jury in Texas on Tuesday ruled that US computer chip giant Intel should pay \$2.2 billion to VLSI Technology in a patent

infringement case.

Intel said it would appeal the decision.

"Intel strongly disagrees with today's [jury verdict](#)," spokesman William Moss said in reply to an AFP inquiry.

"We intend to appeal and are confident that we will prevail."

The suit filed by patent-holding company VLSI in early 2019 accused Intel of violating patents involving memory cache and voltage regulation in its chips, according to [legal documents](#).

The litigation contended that the chip-maker was "willfully blind" to the patents to the extent that it forbade employees from reading about them.

VLSI, which obtained the rights to the chips from Dutch tech firm NXP, did not immediately respond to a request for comment.
