

# TikTok taps new CEO from Chinese parent firm

April 30 2021

---

TikTok has a new top executive who will maintain his job at Chinese parent firm ByteDance

The fast-growing video-sharing app TikTok named a new top executive Friday who will keep his responsibilities at Chinese parent firm

ByteDance.

A statement said Shouzi Chew, ByteDance's [chief financial officer](#), will now also become CEO of TikTok.

Vanessa Pappas, who has served as interim head, will formally take the role of TikTok [chief operating officer](#), the company said, continuing with her current responsibilities.

The announcement was described as a "strategic reorganization to optimize TikTok's global teams and support the company's unprecedented growth."

"The leadership team of Shou and Vanessa sets the stage for sustained growth," said Yiming Zhang, founder and CEO of ByteDance.

"Shou brings deep knowledge of the company and industry, having led a team that was among our earliest investors, and having worked in the technology sector for a decade. He will add depth to the team, focusing on areas including [corporate governance](#) and long-term business initiatives."

The move comes after an effort by the administration of former president Donald Trump to ban TikTok in the United States or force a sale to an American-owned entity, over claims that the app could pose national security risks.

At least one report said the Biden administration had abandoned the Trump effort, which aimed to sell TikTok to US tech giant Oracle and retail power WalMart.

TikTok is believed to have some one billion users worldwide including more than 100 million in the United States, and is especially popular

with young smartphone users.
