General Motors is planning to install up to 40,000 electric vehicle chargers across the U.S. and Canada as part of a new community charging program.

The vehicle maker said Tuesday that the program will start next year. It will work with its dealers to have the [charging stations](#) in locations including workplaces, multi-unit dwellings, sports and entertainment venues and college and universities. According to the company, nearly 90% of the U.S. population lives within 10 miles of a GM dealer.

The charging stations will not be limited to those that have GM vehicles. They will be available to anyone that has an electric vehicle, regardless of the brand.

The program is part of a series of investments the Detroit company announced earlier this month. GM then pledged to [increase its investment in EV charging networks](#) by nearly \$750 million through 2025.

The announcement comes a day after Hertz ordered 100,00 Model 3 [small cars](#) from Tesla—and announced plans to set up its own charging network—due to growing consumer interest in [electric vehicles](#).
