Amazon Go is moving to the suburbs.

The tech giant said it plans to open a new type of store aimed at serving customers in suburban-area locations.

The first one will open in Mill Creek, Washington, in the coming months. Amazon also plans to open a second Go store in the Los Angeles area.

Like other Go stores, the location will leverage technology allowing customers to make purchases without ever interacting with a cashier. Using the Amazon app, you scan to enter, then pick your items. When customers walk out, they are charged for the items purchased through the app.

"We think [local residents](#) and commuters will enjoy the ease of our Just Walk Out Shopping to quickly and conveniently shop from an expanded selection of tasty, ready-to-eat food items and grab-and-go beverages and snacks in their own neighborhood," said Amazon in a statement.

The company has Amazon Go stores in four states, mostly in downtown [metropolitan areas](#) including New York City, Chicago and Los Angeles.

Amazon said the new suburban Go stores will offer snacks, everyday essentials, beverages and grab-and-go [food items](#).

Last November, Amazon introduced a new concept store with Starbucks, combining the retailer's Go shopping tech with Starbucks Pickup to let consumers shop cashier-free.

The store also features a modern lounge with individual workspaces as well as larger tables with power outlets and USB ports.
