California air quality officials on Tuesday released a groundbreaking proposal to require all new cars sold to be zero-emission vehicles by 2035, a rule that would make it the first state to mandate the phaseout of gas-powered vehicles that are fueling the climate crisis. It signals the beginning of the end for combustion engines in California.

The state Air Resources Board plan follows through on a 2020 executive order by Gov. Gavin Newsom and is expected to be voted on this
