Lufthansa's operations were disrupted Sunday at Frankfurt airport

because of technical problems, German news agency dpa reported.

Check-in systems on the airline's website and at the counter, as well as boarding, were affected at Germany's biggest airport, a Lufthansa spokeswoman told dpa. Some flights were delayed or would have to be canceled because of the problems.

Check-in was still possible using cellphone browsers on smartphones or tablets, and the Lufthansa app.

The [technical problems](#) were caused by external IT service providers, dpa reported. Lufthansa asked travelers to check the status of their [flights](#) and said it was working with "high-pressure" to resolve the issues.

Last month, cable damage during construction work in Frankfurt caused Lufthansa computer systems to fail, resulting in flight cancellations and delays worldwide.

Sunday's problems came a day before a national strike in Germany is set to bring the country's traffic to a standstill with airport, train and public transportation employees all protesting for [higher salaries](#) in a one-day walkout on Monday.

Air traffic was already canceled on Sunday at Germany's second-biggest airport in Munich because of the upcoming strike.
