The <u>U.S. Commerce Department added two Europe-based spyware</u> <u>companies</u> to its technology export blacklist on Tuesday for developing surveillance tools deemed to have threatened U.S. national security as

well as the privacy and integrity of individuals and organizations worldwide.

Such tools are regularly used for <u>political repression and other human</u> <u>rights abuses</u>, including for spying on journalists and intimidating political dissidents.

The sanctioned companies are in Greece-based Intellexa S.A., Hungary-based Cytrox and related entities in Ireland and Macedonia. Intellexa and Cytrox have been linked to Predator spyware, whose reported use in Greece helped precipitate the resignation last year of two top government officials, including the national intelligence director.

Commercial spyware firms already on the Commerce Department's socalled Entity List—essentially making it illegal for U.S. companies to do business with them—include Israel's NSO Group, maker of the much better known Pegasus spyware. It was added in November 2021.

The exact business relationship between Intellexa and Cytrox is unclear and the Commerce Department did not specify it.

Tuesday's blacklisting follows a White House executive order in March that deemed the unchecked proliferation of mercenary spyware a threat to national security. Dozens of U.S. government employees were found to have been targeted with Pegasus.

In December 2021, digital sleuths at the University of Toronto's Citizen Lab <u>discovered Predator spyware on the iPhone</u> of a leading exiled Egyptian dissident. In a <u>joint probe with Facebook, Citizen Lab</u> <u>discovered</u> that Cytrox had customers in countries including Armenia, Greece, Indonesia, Madagascar, Oman, Saudi Arabia and Serbia.

Cytrox was at the time part of a shadowy alliance of companies under

the umbrella of Intellexa, which was created in 2019 to compete with NSO Group. Its founder was former Israeli military officer Tal Dilian.

A message left for Dilian seeking comment was not immediately returned.
