China's internet watchdog has laid out regulations to curb the amount of time children spend on their smartphones, in the latest blow to firms such as Tencent and ByteDance, which run social media platforms and online games.

The Cyberspace Administration of China on Wednesday published the draft guidelines on its site, stating that minors would not be allowed to use most [internet services](#) on [mobile devices](#) from 10 p.m. to 6 a.m., and that children between the ages of 16 and 18 would only be able to use the internet for two hours a day.

Children between the ages of 8 and 15 would be allowed only an hour a day, while those under 8 would only be allowed 40 minutes.

Only certain services, such as apps or platforms that are deemed suitable to the physical and mental development of minors, will be exempted. The CAC did not specify which internet services would be allowed exemptions.

The [restrictions](#) are Beijing's latest efforts to attempt to limit internet addiction, a problem it views as widespread among its youth. In 2019, Beijing limited children's daily online game time to 90 minutes a day and tightened those restrictions in 2021, allowing children only an hour a day of online game play on Fridays, weekends and public holidays.

Short-video and online video platforms like Douyin, Bilibili and Kuaishou have offered youth modes that restrict the type of content shown to minors and the length of time they can use the service. Children are also pushed [educational content](#), such as science experiments.

The latest restrictions would impact firms like Tencent, China's largest online game company, and ByteDance, which runs popular short-video platform Douyin. Firms in China are often responsible for enforcing regulations.

"To effectively strengthen the online protection of minors, the CAC has in recent years pushed for the establishment of a youth mode on internet

platforms, expanding its coverage, optimizing its functions and enriching it with age-appropriate content," the CAC said.

"Since the mode was launched, there has been a positive impact in reducing youth [internet](#) addiction and the impact of undesirable information," it added.

The CAC said draft guidelines were open to public feedback until Sep. 2. It did not say when the new rules would be into effect.
