Production at the maker of Chrysler, Dodge, Jeep and Ram models is being affected after a cyberattack on an automotive supplier disrupted its operations, the automaker said.

The cyberattack affected Chinese supplier Yanfeng International Automotive Technology Co. Ltd., whose website wasn't working Monday evening. The company's North American headquarters is in Novi. It manufactures a number of just-in-time parts, including seats, interiors, electronics and other components.

She declined to specify what production or locations have been affected.

Crain's Detroit Business reported the disruption earlier Monday.

Cybersecurity is an increasing concern for many businesses, governments and other organizations. Two [lawsuits](#) recently were filed against the University of Michigan after hackers were able to access [personal information](#) of up to 230,000 people at the beginning of fall semester.

Stellantis and Yanfeng also recently won a motion to obtain equipment from Auburn Hills supplier Unique Fabricating Inc., which filed for Chapter 7 bankruptcy last week.
