

# An evaluation of machine learning to identify bacteraemia in SIRS patients

27 August 2018, by Ingrid Fadelli

Correlogram of features with the highest correlation to PCT. The labelling of the x and y axis is presented in the diagonal. Following parameters are displayed: PCT=procalcitonin, CRP=C-reactive protein, TP=total protein, LBP=lipopolysaccharide binding protein, Alb=albumin, Crea=creatinine, IL-6=interleukin-6, NeuR=relative proportion of neutrophils, Plt=platelets, Bili=bilirubin; Spearman correlation coefficient is presented in the left lower part of the correlogram p-values are denoted as following: \*\*\*
