

# Sony shutting down PlayStation VUE cut the cord service

30 October 2019, by Jefferson Graham, Usa Today

---

This has not been a good week for cord cutters looking for cable TV alternatives.

Tuesday, Sony said it will shut down its PlayStation VUE service on Jan. 30. VUE competed with DirecTV, YouTube TV, Hulu with Live TV and Sling with cable TV alternatives, offering viewers a cheaper way to get the channels they love, without having to rent cable boxes and DVRs.

"The highly competitive Pay TV industry, with expensive content and network deals, has been slower to change than we expected," Sony said in a blog post. "Because of this, we have decided to remain focused on our core gaming business."

Monday, AT&T said it lost nearly 200,000 subscribers to its AT&T Now (formerly DirecTV Now) streaming service, which looks to offer more affordable pay TV, with fewer [cable channels](#) for streamers who want to ditch cable.

But these packages have become more expensive, as rights holders demand more money for programming. YouTube TV, for instance, began in 2017 as a \$35 monthly package, and is now \$50 monthly, the same price as VUE after a recent price hike.

In December, when U.S. TODAY reviewed the top cable TV alternatives, YouTube TV was \$40 monthly and VUE \$44.95.

For folks looking to cut the cord and ditch [cable](#), but still watch their favorite channels, this is not a good sign, as the industry looks to streaming channels instead to sell to consumers.

Friday Apple's TV+ launches, followed by Disney + on Nov. 12 and in 2020 HBO Max and NBC's The Peacock.

Sling TV, price wise, is still the best bargain for consumers, starting at \$25 monthly.
