T-Mobile, one of the three largest mobile carriers in the U.S., said it's working to fix a widespread network issue.

The [company](#)'s president of technology, Neville Ray, country's largest carriers, along with AT&T and Verizon, after buying rival Sprint. The company has started integrating the two networks.

The Federal Communications Commission, which oversees voice and data networks, said its public-safety bureau is looking into the problem.

T-Mobile paid a \$17.5 million fine for two nationwide service outages on the same day in August 2014, which together lasted three hours and prevented customers from being able to call
